(ARR 209 Robert Deds House 3364 Uniontown Road

Earhart Cover sold the property at 3364 Uniontown Road to John Reifschneider in 1811 for \$100. Reifschneider made some improvements to the property because the land records show that he sold it two years later for \$200 to Robert Dods. The house on the property was probably improved to its present design by Dods, and the house remained in the Dods family until 1863. The house has a Flemish bond main facade with a dentil cornice made of header bricks. The windows have flat-arch lintels, and there is a transom over the entrance. The sharing of the wall between the two buildings is a theme that we've looked at in a number of Uniontown buildings. In several cases it was the same owner expanding his own house. In this instance, as in the case with Charles Sower's proposed dwelling at 3367 Uniontown Road, it involves an agreement between the two owners that is written into the land records. In these cases, it appears a matter of expediency and the residents' concept of urban architecture are the reasons that this use of a party wall occurs. This house also presents a good example of an early L-shaped plan. In the early houses, a one-story porch on the inner side of the ell was more frequently used instead of the double-tiered porch that became popular later in the century.
